

System Architecture

Embedded Ubiquity Networking

QD2040 SERIES EMBEDDED SITE COMMUNICATION CENTER

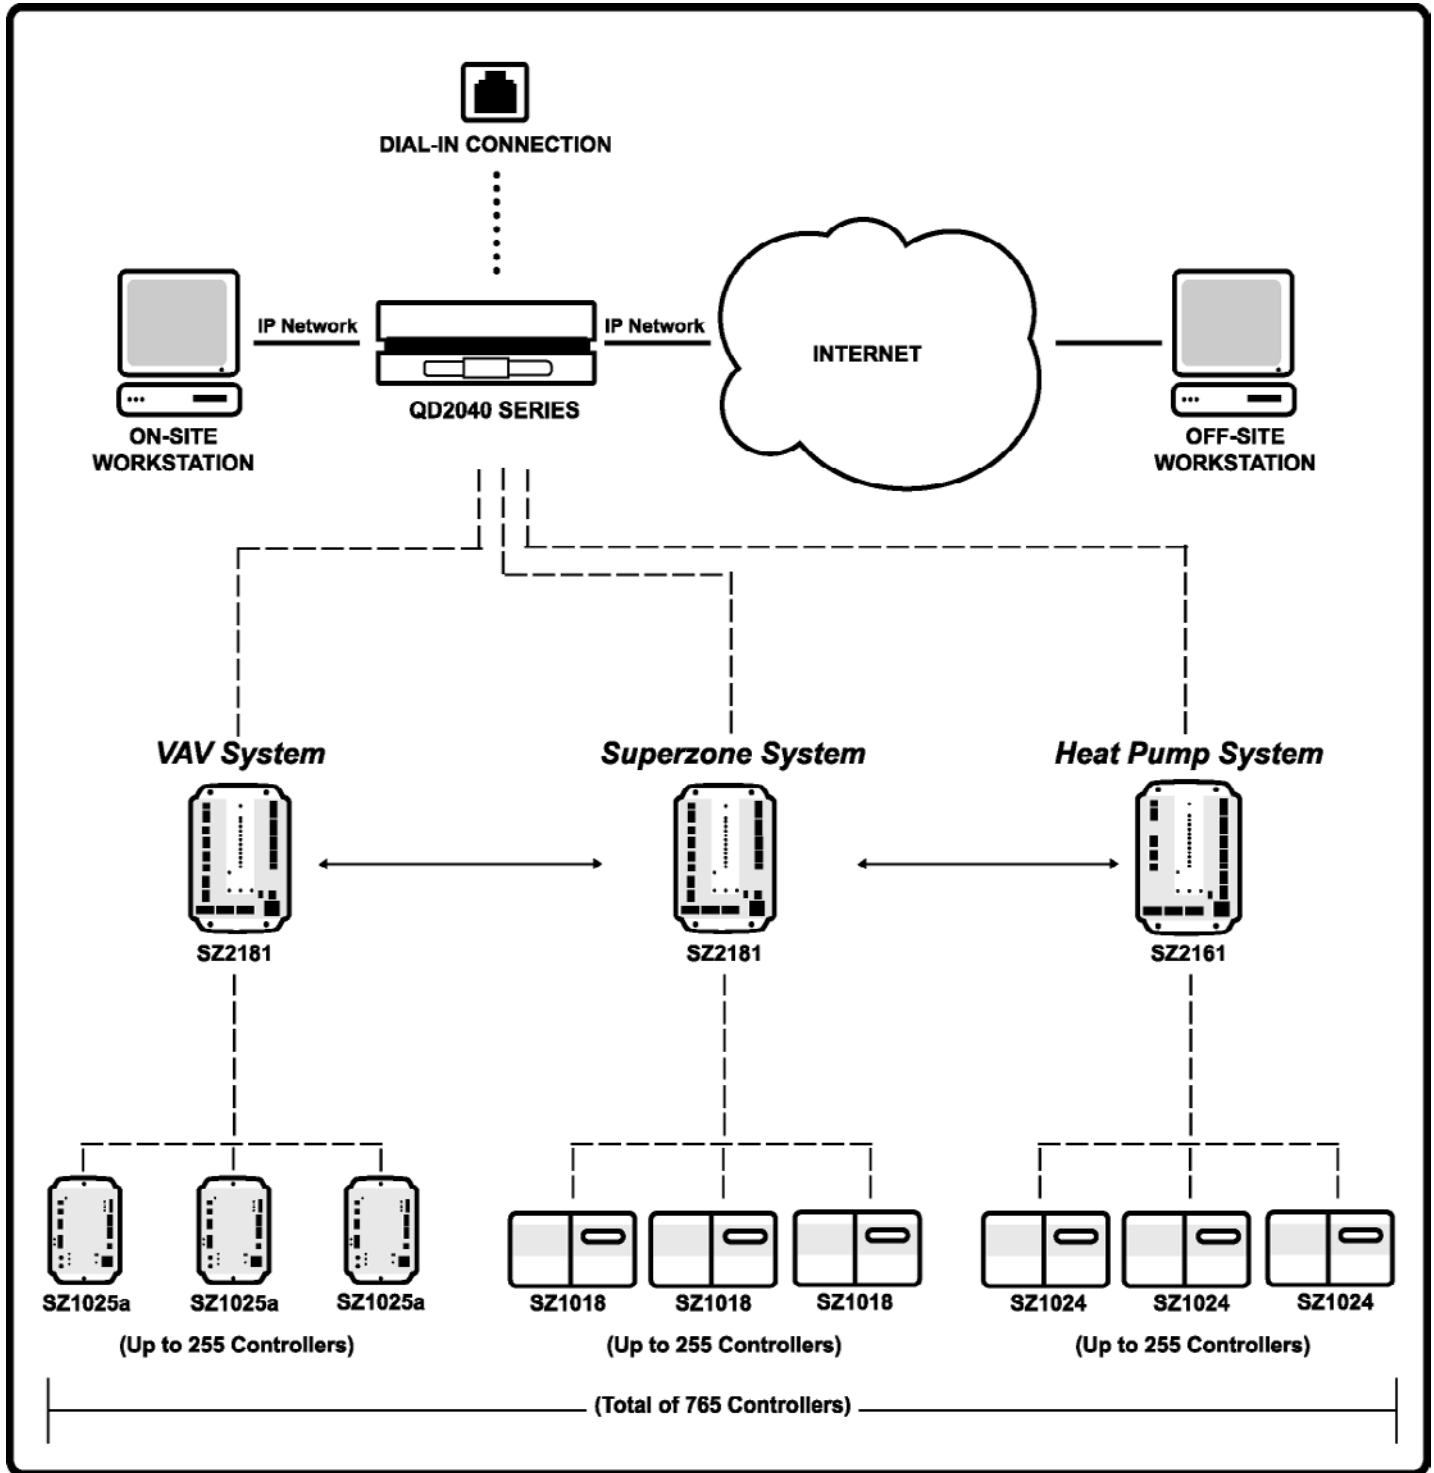

Provides single site monitoring and control of energy management system with a browser interface. The QD2040 coordinates with other QD2040's through a centrally hosted server to provide multi-site capabilities.

Expanded Embedded Ubiquity Networking

QD2040 SERIES EMBEDDED SITE COMMUNICATION CENTER

Provides system coordination for zoning and loop systems with browser interface. The QD2040 coordinates with other QD2040's through a centrally hosted server to provide multi-site capabilities.

Ubiquity Multi-Site Networking

QD2020i, QD2020ie or QD2040 SERIES SITE COMMUNICATION CENTER

Allows simple single or multi-site monitoring and control with browser interface via the internet from anywhere, anytime utilizing a centrally hosted Ubiquity server.
