# Sierra Wireless AirLink™ Raven XE

## Intelligent 3G Ethernet Gateway

*Powerful Connectivity for Enterprise Applications*

The Raven XE provides high-speed connectivity in a compact and sleek form factor for critical enterprise applications. Designed to handle rugged and robust applications, the Raven XE is ideal for fixed and portable broadband connectivity.

Powered by **ALEOS™** embedded intelligence and the **AirLink software suite**, the Raven XE reduces field time and enables secure data for mission critical applications.

Powered by **ALEOS** intelligence, the Raven XE provides persistent and reliable connection necessary in remote locations as well as embedded security features, such as IPsec compliant VPN and GRE tunneling to ensure that data is secure from any unauthorized access.

Affordable, reliable solution for critical commercial applications such as:

- Retail/POS and ATMs

- Digital Signage and CCTV
- Primary or temporary 3G broadband connectivity

#### Features

- Embedded ALEOS Intelligence
- High speed Ethernet port
- Remote management
- Class I Div 2 Certified
- Rugged Enclosure
- Compact form factor
- Mini-USB
- IPsec VPN
- Lower power consumption
- Status LEDs

#### Benefits

- Reliable network connectivity for mission critical applications
- Supports high speed data applications
- Lowers total cost of ownership
- Approved for use in hazardous environments
- Can be deployed in harsh conditions
- Easy integration into existing enclosures
- Enables module level diagnostics and updates
- Data security for piece of mind
- Enables use of alternative power (battery, solar)
- Simplifies troubleshooting
