TCS Basys Controls®

PP Series
Custom Panels

Description

The PP Series panels are designed to house TCS/Basys Controls thermostats, controls, communications modules and accessories. The PP2000 Series is specifically designed to house the QD2040 Embedded Site Communication Center. The PP2000 Series comes with the PP2100 wall mounting shelf attached to the panel door. The PP2100 mounting shelf is also available separately for mounting the QD2040 to a wall or other vertical surfaces.

The PP Series features:

• Protective enclosure for controls and instrumentation
• Pre-engineered and wired for easy installation
• Custom size and design available
• Wire duct and cover for clean design
• CAD design layout
• I/O Schedules

Specifications

16-14 gauge steel Hoffman enclosures
14-12 gauge steel mounting panels
